

# I/O Expander

The distributor box „I/O Expander“ is used for fast, flexible and reliable signal connection with the MultiPro 3G. The I/O Expander is connected to the interface (X17) with its permanently fixed connection cable.

This makes it possible – instead of costly individual wiring – to connect external components and DSM options comfortably to the distributor box with sensor actuator cables and so to connect them to the MultiPro 3G.

4/4 Single

## **E/A-Expander 4/4**

MS-1002204

I/O Expander for comfortable connection via I/O cables  
4 ports, single incl. cable (2,5 m) – for the options RS, HB, MB

## **E/A-Expander 8/8**

MS-1002208

I/O Expander for comfortable connection via I/O cables  
8 ports, dual incl. cable (2,5 m) – 8 inputs, 8 outputs

# I/O Expander

I/O Expander 4/4 (4 Ports, single) incl. cable (MS-1002204)

I/O Expander 8/8 (8 Ports, dual) incl. cable (MS-1002208)
